HOME FENCING AT IT'S BEST.

The Hurricane Home Fence System, in addition to providing a perimeter barrier through its vertical bar design, allows full through vision giving endless scope for landscaping and views. Ideally suited for those locations where security, visual appeal and integrity of access share equal importance.

An attractive and effective result can be achieved by using either the fold top or balustrade panels, used in conjunction with Home Fence square posts, which have a flanged option enabling the post to be secured to existing paving or deck. Add to this the free swinging simple catch home fence gate and excellent results can be achieved.

The Home Fence system is constructed of the highest quality material which is galvanised for long life protection and like all Hurricane products is 'Built to Last'.

FOLD TOP PANELS are the accepted profile recognised as a superior fence solution.

BALUSTRADE PANELS are an attractive new slimline profile offering a modern style of home fencing.
