Perimeter Security Integration

Custom Fabrication + Kitsets

Product Support + Maintenance

INTRODUCTION

New Zealand's leading Security and Perimeter Protection Specialists

We are a security and perimeter protection specialist that consults, designs, fabricates and installs high-quality solutions for clients across New Zealand and the Pacific.

Projects cover commercial, industrial, and government-funded infrastructure, with clients ranging from Local Councils, MBIE, NZTA, NZDF and Department of Corrections to schools, shopping centres, corporate headquarters and embassies.

50
YEARS

We know the importance of staying up to date with the latest in perimeter protection, automation and access control and consult with leading engineers and designers from countries where hostile vehicle mitigation and anti-terrorist products are regularly put to the test. This ensures our customers have access to the world's best in class perimeter security designs.

We've been providing premium security and perimeter protection solutions for more than 50 years. Whether it's a prison, corporate HQ, brewery, animal enclosure or Data Centre you'll probably find that it is one of ours.

SERVICES

At Hampden, we're solutions-focused, problem-solvers who you can rely on to get the job done! Turnkey perimeter security installations are our stock and trade, however we are also happy to be contracted-in on any part of the process.

Turnkey Perimeter Security Installation

If 50 years' experience in making and installing fences and gates has taught us one thing, it's that the earlier we are involved in a project, the better the outcome. This has led us to extend our service offerings to design consultancy for bespoke complex projects and high security perimeter protection.

We complement this offer with our professional drafting service. Here, your plans and design ideas are brought to life through shop drawings (3D modelling and 2D drafting) using SolidWorks CAD software.

We all know accuracy and certainty in construction is essential to the overall build coordination and is increasingly important for design and build contracts for quality and cost control. Don't leave anything to chance – make sure you have the Hampden Design Team on your side for your next project.

SECTORS

A DEEP UNDERSTANDING OF THE INTRICACIES OF EACH SECTOR LIES AT THE HEART OF THE HAMPDEN ADVANTAGE

INDUSTRIAL + COMMERCIAL

Manufacturing, factory, and warehouse fencing need to consider strength and deterrence. While this is important for a commercial space too, aesthetics must be balanced with the needs for safety and security. We have the experience and the products to meet your expectation: Full perimeter security combined with internal safety solutions for an integrated full Turn-Key security installation. We can even add that extra signature detail that lifts your project above the ordinary. Consulting with us early at the design stage is a must for the best and most cost-effective outcome!

VERTICAL DEVELOPMENTS

As populations grow and land becomes more valuable, our cities are going up instead of out. Hampden has the skills and experience to successfully deliver on the requirements in the vertical builds sector. From Architectural styling Balustrade that comes to the fore in the design of modern apartment and commercial spaces to Safety Systems in Carparks and secure storage enclosures for bikes and other valuable equipment. We have a range of styles and solutions to compliment any build.

PRISON + DETENTION + SECURE CARE FACILITIES

With 11 major prison projects completed and 1 under in construction we know how to create a multi-layered secure environment that will more than last the distance. That is why Hampden is the go-to company when it comes to design, product selection, as well as the build itself. These skills transfer directly to child and youth facilities, psychiatric hospitals and into high security sites.

HIGH SECURITY SITES

In an uncertain world, perimeter security at Embassies, Government Departments, Police and Defence Force compounds are needing to be upgraded. More secure designs such as Armourfence™ Palisade, 358 anti-climb mesh are now being demanded over chainlink mesh and razor wire. Hampden can deliver on your high-end security needs without compromising design aesthetics. Add to this our experience with key security elements such as crash tested road blockers, bollards, and other forms of hostile vehicle mitigation (HVM) we can give you the control you require.

MILITARY + POLICE

Hampden has secured many Defence Force facilities over the years. From low security compounds with kilometres of chainlink security fencing, right through to high security compounds with full block-out steel privacy fencing and razor wire. Secure vehicle entrances are paramount and large cantilever gates are often the go-to solution for their reliability. Tire spikes provide added security without inhibiting authorised vehicle flow while crash rated bollards and barriers offer extreme protection when the threat is high.

INFRASTRUCTURE

Rail and motorway fencing comes with its own set of challenges. Hampden has the ability and resources to match your peak operational demands and to deliver a range of commodity products as well as bespoke components - to schedule seamlessly. This has made Hampden the contractor of choice for Project Managers across the Region. Our successful completion of the Waterview tunnel project amongst others is testimony to our capabilities.

EDUCATION INSTITUTIONS (SCHOOLS)

Hampden believes that safety and security of children is so important when it comes to fences and gates for schools, and early childcare centres. Hampden also provides its unique 10 Year Post-to-Post promise on all its work as well as an extensive range of cost-effective fencing that will stretch your dollars even further. Add in Access Control and see what real value Hampden can provide through a total Turn-Key installation.

SPORTS FIELDS AND PARKS

Hampden has a wide variety of proven, effective fence and gate solutions to create robust screens, nets and enclosures for a variety of sporting and recreational applications. Additional high security enhancements can also be added when necessary. Enhancements can include products such as barriers, bollards, and automation/intercoms. Talk to Hampden to find the right solution for your park or recreational property.

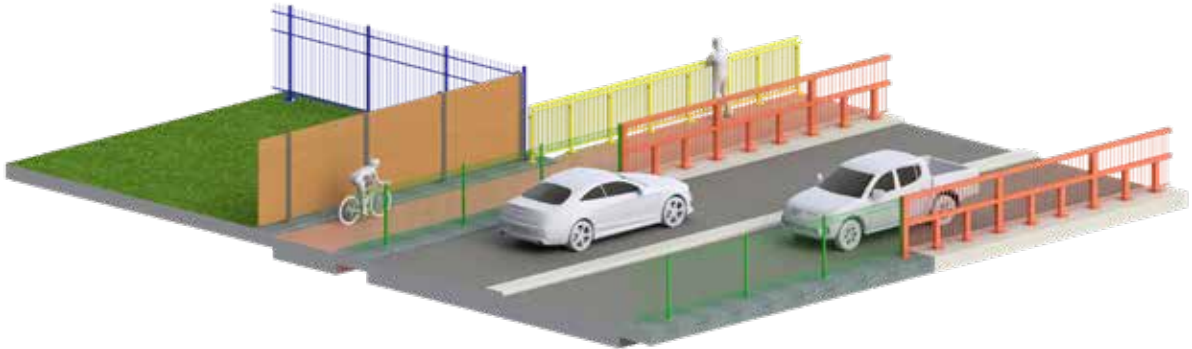

In addition, we've also designed and constructed perimeters for other application: zoos, harbours, airports and housing developments to name a few. In fact, we can control anything you want to keep in or out.

FEATURED PRODUCTS

WE STRIVE TO BE FORWARD-THINKERS, PROBLEM-SOLVERS
AND MASTER CRAFTSMEN.

ROAD SAFETY BARRIER SYSTEM

With over 200km of motorway fencing and multiple bridges along the way, Hampden are a leading partner to NZTA and their head contractors. With in-house fabrication for bridge and walkway railing, we can provide fast turnaround on turnkey projects. Hampden are accredited with several affiliations and proud to have an industry-leading safety record.

 ArmourBarb™ Razor Wire

H | **VEHICLE ACCESS CONTROL**

Vehicle access control ranges from low security applications for commercial properties, right through to high security applications that consider hostile vehicle mitigation like embassies. Products such as sliding gates, automated barriers arms and bollards to crash-rated barriers certified to PAS68, ASTM F2656 and IWA14-1 standards or we can engineer a customised solution. Hampden have a range of products to meet your needs. These can be specified, installed, and integrated into a new or existing access control system.

■ Automatic Bollards

■ Static Bollards

■ Tire Spikes

■ Road Blockers

Automated Barrier Arms

■ ArmourFence™ Palisade

■ Cantilever Gate System

PRODUCTS

Hampden offer huge range of standard and bespoke perimeter security products to suit various sectors. Complex large-scale projects are our speciality, see below for a comprehensive list of our product offerings.

<p>Vehicle Access Control</p>	<ul style="list-style-type: none"> • Road Blockers • Tire spikes • Automatic Bollards • Static Bollards • Automated Barrier Arms • Manual Swing Barrier Arms • Hostile Vehicle Mitigation + Anti-terrorist Barriers
